vector algebra x 13.1**. basic concepts a vector v in the plane or in space is an arrow: it is determined by its
length, denoted $|v|$ and its direction. two arrows represent the same vector if they have the same length and
are parallel (see figure 13.1). we use vectors to represent entities which are described by magnitude and
direction. for example, a force applied at a point is a vector: it is ... **national institute of chiropractic
